

I use an independent Internet Service Provider (Sonic.net) because of their superior service. I am opposed to further deregulation of the telecoms that would endanger independent service providers such as Sonoma Interconnect and monopolize pricing for broadband service.

The telecoms must have regulatory review of their broadband pricing to independent ISPs like Sonic.net. Otherwise my ISP would have to individually negotiate pricing and the ability to interconnect, which would undoubtedly raise the cost of my service. America is about choice not consolidation.
